

Pulsar360 Telecom, Inc Announces Partnership with TAG

Telecommunications experts at Pulsar360 have partnered with Technology Assurance Group

Colorado: Pulsar360 Telecom, Inc (<http://pulsar360.com/>), provider of telecommunications systems and services, has formed a strategic partnership with Technology Assurance Group (TAG). TAG is an organization of leading unified communications companies in North America representing \$350 million in products and services. TAG Members benefit from a variety of programs including best business practices, advanced sales training and financial analysis, professionally led peer group interaction, and strategic partnership with leading technology manufacturers. (<http://www.tagnational.com/>).

On behalf of its Members, TAG partners with technology manufacturers that deliver exceptional value and world class services to small and medium sized businesses. The organization has a very strong and thorough technology evaluation process in addition to rigorous and strict criteria. Through their evaluation process TAG found Pulsar360 Telecom, Inc to be the ideal cloud voice provider to carry their Members into the future.

TAG and Pulsar360 have developed a unique industry program that combines an innovative cloud voice solution with provided equipment such phones, routers, and POE switches into a single month-to-month bill for the customer. This program has revolutionized the way in which the end-user acquires telecommunications services and equipment. Essentially, this program enables business owners to make technological improvements to their telecommunications systems and services, without a large capital outlay that is often associated with upgrades in technology.

“We’re thrilled to bring the leader in cloud voice to our 90 Members across the country,” said Brian Suerth, President of TAG. “This revolutionary program has the most disruptive pricing and least amount of risk for the customer than any other cloud voice solution in the marketplace. Additionally, TAG Members will not only have the happiest customers in the industry but they will also have a competitive advantage that is available only to them.”

About Pulsar360 Telecom, Inc. Pulsar360 Telecom, Inc. offers Hosted Cloud PBX & Premised based systems, and SIP Trunks. All of which are aided by Business Continuity Disaster Recovery for both the "dial tone" and telephone systems in case of an outage. Pulsar360 is a North American based Telecommunications Provider with roots going back to 2001, but consists of a staff with over 210 years of combined experience. Current customers include Maid Brigade's National Sales Center, numerous call centers, and divisions of E-Bay. For more information on Pulsar360 go to <http://pulsar360.com> or:
